 - Color-Enhanced Brown

SOIL

Sold: Bulk by the Cubic Yard

Screened Sand

- **Composition:** Our Screened Sand is high in quality. It is screened through a 1" screen. Our sand is traditionally light gray or tan in color, but we do have limited quantities of white sand. Our sand meets the toughest of specs and is one of our best-selling products.
- **Applications:** Asphalt Production, Utilities and Various Construction Projects

Topsoil

- **Composition:** Our Screened Topsoil is run through a 1" screen to remove any rocks, roots, and vegetation. The product is a chocolate brown organic material.
- **Advantages:** It has a consistent texture that can easily be worked by hand or with machinery.
- **Applications:** Leveling Low Areas, Filling in Shallow Holes, Covering Exposed Tree Roots, Base for Grass Seed or Sod Applications.

ROCK

Sold: Bulk by the Cubic Yard

Flex Base

- **Composition:** 50 percent Crushed Concrete Fines (powder) mixed with 50 percent 1.5-inch crushed White Crushed Concrete Rock.
- **Advantages:** When packed with heavy equipment and applied on a solid dry base, this makes an excellent road base. TX DOT Item 247
- **Applications:** Commonly referred to as road base, it can be used for roads, driveways, and parking areas. Works best when put over a crushed rock surface and then compacted. Do not apply over muddy areas until they have totally dried out.

Pea Gravel

- **Composition:** 3/8-inch minus in size, smooth round pebbles, multi-colored earth tones.
- **Applications:** This is a great material for decorative driveways, pathways, French drains, playgrounds and picnic areas. It also can be used in the bottom of garden planters, containers, pots and flower boxes for drainage.

**NOTE: Actual materials may look different than pictures below.*

THE MATERIALS STOP

MULCH

Sold: 2 Cubic Feet Bags or Bulk by the Cubic Yard

Hardwood Mulch

- **Composition:** North Texas native trees freshly ground. It is brown in color. This mulch is ground from living plants and trees, as opposed to dead wood like pallets and lumber.
- **Advantages:** It retains soil moisture, inhibits weed growth, assists in prevention of soil erosion, breaks down over time and adds humus to your beds, light and easy to spread, provides a rich manicured look to your landscape, ground on site, and is the freshest material; it smells great too!
- **Applications:** Flowerbed and garden top dressing, great for playgrounds and picnic areas.
- **Special Notes:** Spread 3-4 inches.

Color-Enhanced Red Mulch

- **Composition:** Freshly ground, it is a blazing red color.
- **Advantages:** It retains soil moisture, inhibits weed growth, assists in prevention of soil erosion, light and easy to spread, provides a rich manicured look to your landscape, ground on site, and is fresh material.
- **Applications:** Flowerbed and garden top dressing.
- **Special Notes:** Spread 3-4 inches.

Color-Enhanced Black Mulch

- **Composition:** North Texas native trees freshly ground. It is a rich black color. This mulch is ground from living plants and trees, as opposed to dead wood like pallets and lumber.
- **Advantages:** It retains soil moisture, inhibits weed growth, assists in prevention of soil erosion, breaks down over time and adds humus to your beds, light and easy to spread, provides a rich manicured look to your landscape, ground on site, and is fresh material.
- **Applications:** Flowerbed and garden top dressing.
- **Special Notes:** Spread 3-4 inches.

Color-Enhanced Brown Mulch

- **Composition:** North Texas native trees freshly ground. It is a deep brown color. This mulch is ground from living plants and trees, as opposed to dead wood like pallets and lumber.
- **Advantages:** It retains soil moisture, inhibits weed growth, assists in prevention of soil erosion, breaks down over time and adds humus to your beds, light and easy to spread, provides a rich manicured look to your landscape, ground on site, and is fresh material.
- **Applications:** Flowerbed and garden top dressing.
- **Special Notes:** Spread 3-4 inches.
